

SERVICE SHEET — supplementary disclosure to the Regulator

INTERNAL — this page is not sent

COVERING EMAIL — the whole of it

To: Renee.Matheson@oir.qld.gov.au · Cc: the OIR appeals registry
Subject: WC/2024/227 — Shepherd — supplementary disclosure

Dear Ms Matheson,

By way of continuing disclosure, I attach a supplementary list of documents together with the document it lists.

Kind regards,
Cory Lea Shepherd
Appellant, WC/2024/227

NOTHING FURTHER. No mention of the request for medical information, the psychiatrist, the report, the exclusion, or any date in July 2026. No explanation of why these documents or why now — the 5 August list already said disclosure was continuing, and an explanation is the one thing that would make this email interesting. **Send before the pack goes to the practice.**

THE TWO ATTACHMENTS TO THE EMAIL

- 1 · **SUPPLEMENTARY_LOD_17AUG2026.pdf** — the list itself
- 2 · the **role description** — the document alone, no index page

THE MOVEMENT FORMS ARE NOT SERVED NOW — decided 17 August. They are 2026 capacity documents; capacity is the employer's question, not a matter in issue in the appeal, and the appeal's disclosure scope stops at 30 June 2024. Their relevance in the appeal arises, if at all, through the report — so they are produced **with the report at delivery**, as part of the expert's materials, which is the ordinary course. If the Regulator asks for them sooner (the letter of instruction and schedule she receives with the report describe them), **provide them on request, without argument.**

SEQUENCE. Send this FIRST on Monday morning, then the pack to the practice. Same-day is sufficient; the order is what matters — the Regulator must hold the role description before the practice holds an instruction that reasons from it.

AND AFTERWARDS: when the report is later disclosed, the covering note already says the same report went to both parties. Nothing in this service sheet is ever referred to again — a supplement to a continuing-disclosure list needs no follow-up.
