

ROSTER RECORD, 20 March 2023 to 1 September 2024

Working analysis of the published Switchboard rosters held by the Appellant (documents/rosters/2023-24_published), prepared 6 September 2026. INTERNAL. Cell entries were read by eye from scanned rosters and must be checked against the page before any use in a filing. Codes: E = early (start 06:00 or 07:00), L = late (14:00 or 15:00), N = night (22:00 or 23:00), x = marked off, · = blank, AL = annual leave, RDO. Uncovered = shifts shown in the roster's own Uncovered Shifts row.

A. Your line, fortnight by fortnight

Fortnights not held: 10 Jul to 17 Sep 2023; 16 to 29 Oct 2023; 27 Nov to 10 Dec 2023; 8 to 21 Jan 2024. Reissued or duplicated fortnights in the pack: 30 Oct to 12 Nov 2023 (v2.0), 15 to 28 Apr 2024 (two files, both labelled v1.0), 29 Apr to 12 May 2024 (two files, both v1.0), 19 Aug to 1 Sep 2024 (v2.0). The 18 to 31 Mar 2024 roster as published carries no line for the Appellant.

B. Sick and other leave against the rostered shift

From the Payroll leave takings report of 4 September 2026, matched to the published roster for the day and the two days before it. Only leave in the roster window is shown. 'n/h' = fortnight not held.

C. What the record shows

In 206 rostered shifts across the fortnights held, the shortest break between consecutive shifts is fifteen hours. Not one break falls below twelve hours, and not one sits at the ten-hour Award minimum. The twelve shortest are all fifteen hours, and they are of two kinds: an 07:00-15:00 followed by an 06:00-14:00 the next day, and a 15:00-23:00 followed by a 14:00-22:00 the next day. The median short-interval break is sixteen hours. On this record the ten-hour minimum was not something the roster worked to; the roster ordinarily sat five or six hours above it.

The seven-hour break of 17 to 18 March 2024 is therefore more than twice as short as anything else the Appellant was rostered in the year, and it is the only break of its kind. The Respondent pleads that it was human error and not repeated. The record supports 'not repeated' and goes further: nothing remotely like it occurs anywhere else.

It also falls across a fortnight boundary, and it appears on no published roster. The roster for 4 to 17 March 2024 ends with the Appellant on 15:00 to 23:00 on Sunday 17 March. The roster for 18 to 31 March 2024, as published and as held, contains no line for him at all, although the Respondent admits he commenced at 06:00 on Monday 18 March. Read at 300 dpi, that roster lists Jeffrey, Abbott, De Iacovo, Conaghan, Court, Parry, Fitzpatrick, Sutton-Mason, Ismail, Hu, Malsbury, Nelson and Kendrick, and no Shepherd; the rosters immediately before and after it both carry his line and payroll number 388372. A late-to-early transition that straddles the boundary between two fortnightly rosters is visible on neither of them. That is the kind of gap a fatigue risk assessment of the roster exists to catch, and Metro South has stated in writing that no such assessment applied to the Switchboard before 30 June 2024.

Thirteen backward rotations. Counting transitions between blocks of shift types, the line rotates forward (start times getting later) 37 times and backward (start times getting earlier) 18 times, of which thirteen are a block of late shifts followed by a block of early shifts, with two to four days between. Dr Hawes recorded on 1 July 2024 that the Appellant reported 'manipulate his roster- so he works lates then earlies'. That pattern is in the rosters, thirteen times between April 2023 and June 2024, and it is the direction of rotation that the fatigue literature and the Queensland Health fatigue guideline treat as the more demanding one.

The rosters were reissued. 30 October to 12 November 2023 was issued as v2.0. The fortnights of 15 to 28 April and 29 April to 12 May 2024 each exist in two different versions, both labelled v1.0. The April change moved the Appellant's nights from 23 to 25 April to 26 to 28 April, which with the following fortnight produced six consecutive night shifts from 26 April to 2 May. The May change replaced earlies on 10 to 12 May with lates. The updated versions are also the first to carry After Hours Oncall rows for Ms Taylor and Ms Stibbard. Ms Reese's email of 10 May 2024 acknowledging 'a few rostering errors made by Chloe with regards to Cory's line in past rosters' sits between the two reissues.

Consecutive shifts and uncovered shifts. Runs of six or more consecutive rostered shifts occur eight times in the fortnights held, and runs of five a further eight times. Thirty-one shifts appear in the rosters' own Uncovered Shifts row, ten of them in the two fortnights of 18 September to 15 October 2023 and six in 4 to 17 March 2024.

Sick leave sits at the end of runs and at the turn of the pattern. Three consecutive nights in June 2023 all taken as sick; 21 to 22 November 2023 after five consecutive early starts, inside which falls the 16 November 2023 consultation recording poor sleep with shift work; 2 January 2024 on a night that followed an early; 19 March 2024 after the seven-hour break; 7 May 2024 on the third of four consecutive earlies; 13 to 14 May 2024; 31 May 2024 on an early after a late; and 7 to 9 June 2024, the last three shifts before the bereavement, all lates, all taken as sick. Every rostered day from 17 June 2024 is leave without pay.

What the published rosters cannot show. A published roster records the shifts as planned and the leave already approved when it was published. It does not record sick leave, which by its nature is taken after publication. The team's unplanned absence is therefore not countable from this set. What is visible is planned annual leave, N/A markings against casual staff, and the Uncovered Shifts row. The 22 working rosters scanned on 22 March 2026 are annotated by hand with S/L, LWOP and shift changes across the team, and are the only documents held in which team absence appears; they post-date the injury.

Caveats. Four fortnights in the window are not held: 10 July to 17 September 2023, 16 to 29 October 2023, 27 November to 10 December 2023, and 8 to 21 January 2024. Cells were read by eye from scanned images and must be checked against the page before use in a filing. The 18 to 31 March 2024 finding rests on the file as held; the employer's rostering system may hold a later version that includes the Appellant, and that version should be sought, because either answer assists: no later version means the shift was allocated off the published roster, and a later version means the roster was changed after publication.

D. Every other roster held in the repository

Checked 6 September 2026: the 2025-26 published set (20 fortnights, text layer, parsed automatically), the 22 handwritten working copies scanned 22 March 2026, and the 2022 rosters inside the Chloe Taylor correspondence pack at pages 119 to 134.

2025-26 published rosters: 162 rostered shifts, not one break under twelve hours. The shortest is thirteen hours (Mon 3 Nov 2025 15:00-23:00 to Tue 4 Nov 12:00-20:00), then two of fourteen, then a band of fifteen. Taken with the 2023-24 set, the Appellant was rostered **368 shifts across the two periods without a single break below twelve hours**. The seven-hour break of 17 to 18 March 2024 stands alone in the whole record.

The night pattern after the return to work. In ten of the twenty fortnights the Appellant is rostered four consecutive night shifts; in the other ten, none. A 12:00-20:00 shift appears in this period which does not appear in 2023-24. The set ends at 29 March 2026. The Employee Capability Checklist of 3 July 2026 recommends no more than two night shifts; no roster after that date is held, so nothing in this set tests compliance with it. Rosters from July 2026 onward should be sought if that question is to be answered.

Team leave on the published 2025-26 rosters: 4,662 staff-days on the page, and two sick-leave entries. Across the twenty fortnights the rosters record 75 cells of annual leave, 51 of N/A against casual staff, 7 of long service leave, 3 of leave without pay, and 2 of sick leave. That is the proof of the structural point: a published roster records leave approved before publication, so annual leave appears and sick leave does not. The team's unplanned absence cannot be counted from published rosters, and any attempt to do so would understate it by an order of magnitude. The source for that question is the employer's leave data for the Switchboard cost centre, which should be sought de-identified.

The handwritten working copies are where changes appear. The 22 pages scanned on 22 March 2026 are the working copies of the same 2025-26 fortnights, annotated in pen. On the copy for 9 to 22 June 2025 the Appellant's night shift of 16 June is altered by hand from 23:00-07:00 to 22:00-06:00, and his shift of 22 June from 07:00-15:00 to 09:15-15:00. Similar annotations, including S/L, LWOP and swaps, appear across the team on the other pages. These are the documents in which post-publication change is recorded, and no equivalent set is held for 2023-24.

2022 rosters, and what they show about version control. The Chloe Taylor correspondence pack contains rosters for 19 September to 2 October 2022 at v3.0 and for 3 to 16 October 2022 at both v1.0 and v3.0. Reissuing a fortnight was therefore ordinary practice, and it was ordinarily versioned. That matters for the two 2024 reissues: the fortnights of 15 to 28 April and 29 April to 12 May 2024 exist in two materially different versions **each labelled v1.0**. The change is unversioned. The point about those reissues is not that they happened, which was routine, but what they contain and that the version number did not move.

Also held and not analysed here: the Consultation Paper on Proposed Rosters of November 2024 and its outcome document of December 2024 (14 scanned pages), and the photograph of the roster board of 4 April 2023 in the text messages. Both post-date or sit outside the shift-by-shift analysis above.
